THE ART
OF LOOKING
AT ART

AN **ABSTRACT** TO ACTUAL

www.rangkalaglass.com

“SHREE RANGKALA GLASS DESIGN”

incepted with unique idea of numerous GLASS based products. The products are conscious combinations of material and art; soon they started getting the admiration and acceptance both from the architecture fraternity and end user. There was not less than 16 types of usages been defined and offered to the world.

It was the year 2001, when Prashant Bhagat observed a rapid change in architectural products and interior designing sector. New products and varied usage of new materials was taking shape in the industry.

A unit started in SURAT, took up a floating start and procured its place in india with state of the art precision in products, vast range and timely delivery. Crossing geographical boundaries were followed by receiving orders from Middle East. Now, SHREE RANGKALA GLASS DESIGN has its satisfied customer based at *Dubai, USA, UK & Australia*

DOOR HANDLE GLASS

GLASS FURNITURE

Gone are the days where only durability and toughness of the furniture have been kept in mind, using wood, aluminium, S.S. and M.S. Here are new concepts of glass furniture flourishing across the world and designing field.

Home

Glass Furniture wins the scene with its ability to enhance the beauty of the product without taking much space in vision. Corner Table, Center Table, Fixed & Movable Table, Dining Table, Shaped designer pillars, various statues are in demand.

Work Place

- Glass office table
- Bend glass count
- Glass pillars

FUSION GLASS

Basically fusion glass is made out of a clear glass with adding a process of focused heating. It's done on 6mm, 8mm, 10,, & 12 mm glass.

Home

The heating process is very focused and based on the desired design. A random and geometric design is vastly preferred. It's being used at partition, stairs, shower partition and name plates.

GLASS MURALS

Fusion Glass, Back Painted Glass, Carving Work, Color Glass can be used as per the design and specifications. A valued mural can be a dramatic combination of many of these mentioned glasses and works. These are customised products and being treated as ANTIQUE Work piece.

Home

It is in fashion to have glass murals and decorative pieces at home. It has become the first choice of many interior designers to choose a glass based mural OR a 3D Mural glass work. These pieces are placed at Main Entry, Main Hall Decor, Bedroom Highlight, Dining Area, Office Area, Foyers etc.

KITCHEN GLASS

There are some processes like TOUGHENED, ACID WORK OR BACK Painting work makes the glass work more suitable to the interior design plan of kitchen.

Using glass in kitchen helps achieve a sense of cleanliness in the place. Having them as a table top for dining table OR we can use them at the cabinet doors. Crockery door is the most desired use of glass in the kitchen. It helps to find the things faster and a little work on the glass improves the elegance of the interior.

Usage

- Crockery Glass Door
- Drawer glass
- Kitchen Tiles
- Profile glass

WASH BASIN MIRROR SET

One piece basin can be made from size of 21" x 24" to 36" x 72". Glass thickness of 12mm, 15mm, & 17mm are mostly used. Individual bowl size can be in 14 1/2 x 14 1/2, 16x16, 12x12, & 14 x 21. In this 12mm glass are being used.

Home

Glass Wash Basin Mirror set can be made with customised color OR design preferences, it also can be made uniformly.

Glass Wash Basin Mirror set is in big time preference nowadays as it adds elegance compared to ceramic basins. They can be fitted as common basin, Kitchen Basin, Dining Hall, and in master bedroom as well.

LAMINATED DRESSING MIRROR

Dressing mirror is a customised product and available up to 6 to 8ft in size. The thickness varies from 4mm, 5mm, & 6mm. The edges of dressing mirror can be processed as crystal & Bevelled.

Designer dressing mirrors are preferred in bedrooms as they compliment with more space and beauty. There are new concepts to adopt the design of the bedroom and to make the dressing mirror as the part of it.

BACK PAINTED GLASS

Back painted glass is a very unique use of the glass, where the glass leaves its nature of being transparent and converted in to an opaque one. The use of this glass style needs customization and it can be toughened as well.

Back painted glass can create drama to the theme, e.g. logo, theme, faces OR abstract can be painted and installed at various places like kitchen, drawing room partition, temple, back rest of the bed OR the wall behind the bed OR on the door. Various sizes and thickness can be used for back painted glass like 4mm, 5mm, 6mm, 8mm, 10mm & 12mm. It also can be clubbed and sandwiched with mirror as well.

AN **ABSTRACT** TO ACTUAL

STAIR CASE RAILING GLASS

The name itself shares its usage. the stair case and railing glasses enhance the decoration of the interior. the thickness of the glass to be to 6mm to 12mm with toughened quality.

Acid work, crystal work and pasting work can be done in this glass. Galleries and staircase railings are decorated with these glasses.

TEMPLE GLASS & DOOR

Now it has been extended to full glass temple. Many treatments like Acid Cold Crystal Work, Itching work, Grooving Work & color work can be added in a temple glass. Transparent and semi transparent work adds a new dimension and look. Further to that a sacred religious symbol, picture or design possibly added.

Home

Normally the size of the temple of the glass can be stretched up to 6 to 8ft but with a thickness of atleast 10 to 12 mm. Also toughened process is advisable for a longer run.

TABLE TOP GLASS

Table top glasses are prepared customised with the edges differently treated like CRYSTAL Edge, Bevel Edge, and Half Round Edge etc. Further to the same the edges can be shaped to suite the design desired. the table tops with different textures, colours and concepts to suite requirements.

Home

The name itself shares its usage, be it as a Bed Side Table, Office Table, Center Table, Computer Table, T.V. Unit Top, Dining Table, Dressing Mirror Top etc.

Normally a 12mm thick glass is being used as a table top. There are two options as far as the clarity is concerned, 1. Clear Glass & 2. Extra Clear Glass. Work On Extra Clear Glass enhances the sharpness of the colour's clarity, density & shining resulting in a Liveliness of the top.

DOOR GLASS

GLASS FIGURE WORK

Figure work almost goes in the like of back painted glass, only difference is it is made with a spray painting and is done at the front side of the glass.

Basically figure work is preferred for FACES of almighty OR the beloved priests of the cults, Cricket icons etc. Etc.

This is a spray painting and widely misunderstood as a printing, but it is not.

This is a very nice choice and very artistic in its form.
