The FAWAID PAPERS COMPANY has built up to support specially tailored PE Coated Anti-Fungal Soap Stiffeners and Semi-Finished tissue paper need of our customers. Having strong relations with the finest Paper and Board mills in India we provide complete supply chain solutions to our valued customers. Our expertise in analyzing market trends, devising efficient logistical solutions and assured product quality makes us a strong partner for our customers.

We take immense pride in serving our customers who respect our simple organization, professionalism and integrity.

## **OUR PRODUCTS.**

Fawaid Papers offers Soap stiffener Board which is a specialty poly coated paper with customized PE coating, soap stiffener board is majorly used as an inner liner of a soap wrapper to maintain the freshness & fragrance of the soap and to protect loss of moisture.

We offer ARSR Grade stiffener board (Alkali resistant and soap resistant) that can be wrapped horizontally around the soap bar, as they are less likely to bend along sides. This makes stiffener board characteristics and more suitable to remain in the same shape until it reaches to final customer.

### ❖ Anti-Fungal/Mold Treated Stiffener Board.

Since cellulose is the major component of paper which is excellent growth medium for molds/fungus particularly under moist and warm conditions. If bath soap stiffener isn't treated with the special applications of biocidal coating compounds it is on high danger to catch fungus/molds. the use of a fungicide/ Anti-mold coating is essential in soap packaging to prevent spoilage.

To maintain hygiene & prevent fungus growth on soap wrapper we treat stiffener with "Intace" Anti-Fungal/mold Technology. This special coating effectively prevents of mold attack on bath soap bar.

## ❖ Anti-Fungal/Mold PE Coated Stiffener Board.

We FAWAID PAPERS COMPANY offers Anti-Fungal PE Coated Soap Stiffener a combination of PE coating and Intace Anti-Fungal/Mold technology treated special soap stiffener which protects soap bar from both moisturization and fungicides.

The soap bar contains free water while first wrapped, the wrapper and stiffener board are very wet while packing. Since cellulose is the major component of paper which is excellent growth medium for molds/fungus particularly under moist and warm conditions. Studies have found If bath soap stiffener is coated with PE and treated with Anti-Fungal/Mold treatment of biocidal coating compounds then the growth of Fungus and Mold can entirely be avoided. Also improves shelf life of bar soap for a year's even in circumstances like tropical climates.
