

Are you concerned about your health? If yes, then never look into your water storage tank...!

Remember, consistent negligence and lack of awareness about your water storage tank may lead to the bacterial growth, pollutant mud and sludge further giving birth to water-borne diseases viz Cholera, Jaundice, Dengue, Typhoid, Abdominal / Skin diseases etc. into your home.

Now presenting, FASTCLEAN™: India's no. 1 Brand and an ISO 9001:2008 certified service provider in your neighborhood which cleans and disinfects your water storage tank in most hygienic and scientific way using latest German technology appreciated over worldwide within minutes and giving *Cleaner* and *Safer* water for your usage and that too at a very reasonable price..

HOW FASTCLEAN™ WORKS:

- 1) Firstly, the cover of water storage tank and its nearby places is cleaned with high pressure Rotary Jet Machines.
- 2) Secondly, the remaining water from tank is drained out through water suction unit.
- 3) In the third stage, we clean the inside walls of storage tank with the help of Rotary jet machines.
- 4) In the fourth stage, all the sludge and pollutant muddy waste is sucked out through Industrial Vacuum Cleaner
- 5) In the fifth stage, we spray Antibacterial Agent into your storage tank to make it virtually bacteria free.
- 6) Lastly we use Ultraviolet rays to kill the atmospheric bacteria from your tank.

As per International Hygiene standard, it is recommended to clean our storage tank at least 3 to 4 times in a year for better and healthier life. FASTCLEAN™ process can be applied to any type of plastic, metal or concrete tanks of houses, Apartments, Hospitals, Hotels, Schools, Offices, and Complexes etc. FASTCLEAN™'s esteemed clientele includes Apollo Group of hospitals, DPS Schools, Grasim, Ultratech Century, Balco, Jindal and its services are available in more than 27 cities in India and still growing.
